

Presents:

ECG EDUCATION COURSE

12-LEAD PLACEMENT & INTERPRETATION FOR PREHOSPITAL CARE

JUNE 11

TIME: 5:00 PM - 7:00 PM

**SENTARA HEART HOSPITAL
600 GRESHAM DR
NORFOLK VA 23507**

Join us for a focused ECG education session designed to reinforce proper 12-lead placement, improve acquisition accuracy, and strengthen interpretation skills in the prehospital setting.

What You'll Gain

- Reinforcement of accurate 12-lead ECG placement
- Strategies to reduce common acquisition errors
- Improved confidence in ECG interpretation
- Insight into how early ECG accuracy impacts STEMI recognition and patient outcomes
- Practical, case-based discussion relevant to real EMS scenarios

Who Should Attend

- EMS Providers (EMT, AEMT, Paramedics)
- Prehospital clinicians and first responders
- Anyone involved in cardiac patient assessment in the field

This course is developed by the Virginia Heart Attack Coalition EMS Education Workgroup, bringing together clinical expertise and real-world EMS application to support high-quality patient care across the region.
