

TJEMS VILT

Extremes in Trauma Pediatric & Geriatric Patient Assessment

Taught by: Dusty Lynn RN,
MSc., EMT-P, TCRN

When: November 18 1900-2100

We all know kids are not just small adults- or, are they??? We are all taught that pediatric patients are not just small adults. For many reasons this is indeed true. However, let's look at the general responses to trauma in both the Geriatric and Pediatric patient. Their similarities may just surprise you!
